

WASHINGTON STATE DEPARTMENT OF
Natural Resources
Peter Goldmark - Commissioner of Public Lands

Application for Use of State-owned Aquatic Lands

Applicant Name:	DNR Creosote Removal Program
County:	Island
Water Body:	Livingston Bay/Port Susan Bay
Type of Authorization:	Restoration Project
Authorization Number:	
Term:	N/A
Description:	<p>DNR plans to remove 30-50 tons of creosote-treated driftwood debris from the beaches and backshore areas on Livingston Bay on Camano Island, including Iverson Spit County Park, in May 2009. The extent of this project may extend out into Port Susan Bay as shown on the map. The relatively pristine condition of Livingston Bay and Port Susan Bay, and its importance as a stopover for migratory birds makes this location a priority for removal. Removal of creosote prevents harmful toxins from leaching into the waters and sediments of Puget Sound. Completion of the project is pending landowner permissions and a county shoreline permit. Work will be completed with a helicopter, backhoe or excavator, a work crew, and volunteers.</p>

Livingston Bay/Port Susan Bay Creosote Cleanup
